SKILLS

Programming Languages
- Java, JavaScript, TypeScript, Python, SQL, C#, HTML/CSS, Kotlin

Frameworks & Technologies
- Angular, React, Django, Spring Boot, Firestore, Maven, JPQL

DevOps & Development Tools
- Git, Azure DevOps, Docker, Kubernetes, Postman, Microsoft SQL Server, Grafana

Application Support & Administration
- Google Workspace Administration, Google Apps Script (JS), REST APIs, CSV/Data Integration, Agile (Scrum), Content Management Systems (Squarespace, Wix, WordPress)

EDUCATION

Bachelor of Science in Computer Science May 2024
Minor in STEM Education GPA: 3.26
University of Arkansas, Fayetteville, AR

EXPERIENCE

Program and Volunteer Manager November 2024 - Present
Fort Smith Boys and Girls Clubs, Fort Smith, AR
- Provide day-to-day technical support by troubleshooting software issues, developing internal web-based solutions, maintaining the organization's Squarespace website, and administering the organization's Google Workspace environment
- Design and implement technology solutions that automate business processes and reduce manual administrative effort
- Coordinate program logistics across multiple club locations, ensuring resources and schedules aligned with organizational goals
- Develop and implement innovative curriculum elements—including robotics, coding, esports, and digital media—to expand program offerings and increase member engagement
- Oversee volunteer vetting process, including background checks and approvals, to maintain a safe and compliant environment for youth programs

STEAM Lab Coordinator September 2024 - November 2024
Fort Smith Boys and Girls Clubs, Fort Smith, AR
- Designed and facilitated engaging STEAM programs for youth ages 6–18, integrating science, technology, engineering, arts, and mathematics into hands-on activities
- Leveraged industry experience to design accessible, real-world applications of computer science in programming activities
- Supported grant-related initiatives by implementing measurable outcomes for STEAM programming, including a $35,000 Innovation Lab Grant sponsored by Cox Communications and ABB

Applications Development Intern June 2022 - May 2023
J.B. Hunt Transport Inc., Fayetteville, AR
- Converted existing applications to be eligible for Anytime Release through integrating Helm and Kubernetes
- Modernized J.B. Hunt's Training Management System through the development of a Participation API
- Assisted J.B. Hunt's Shipper team in developing features that allowed administrators to make changes to their FAQ page without developer assistance
- Collaborated within the Agile methodology to solidify an understanding of the Software Development Lifecycle

PROJECTS

Internal Technology Solutions - Fort Smith Boys and Girls Clubs October 2024 - Present

- *Incident Report Automation:* Built a Google Apps Script workflow that notified multiple administrators when incident reports were submitted and updated through Google Forms, ensuring the efficient handling of crucial information on child safety
- *Live Website Data Integration:* Connected a published Google Sheets CSV feed to embedded HTML/Javascript, enabling website tables to update automatically without manual edits for club athletics
- *Program Scheduling Application:* Streamlined program scheduling, roster assignments, and room utilization through an online web tool for efficient program planning
- *Club Cash Incentive System:* Developing a cloud-backed virtual banking system to manage member balances, transactions, and reward redemptions to increase program engagement

DungeonMaestro5e March 2024 - April 2025

- Collaborated with a friend to develop and maintain a web application prototype designed to serve as a comprehensive wiki for homebrewed Dungeons & Dragons campaigns
- Served as project manager by implementing the GitHub Projects tool to manage a spreadsheet, task board, and roadmap for product development
- Assumed a frontend role through the use of MaterialUI components, UX Mocks, and graphic design

DASC Room Scheduler August 2022 - April 2023

- Worked with a team of 4 Capstone students to develop a web application providing a reservation system for the new study spaces in the University of Arkansas's Data Science program
- Implemented SQLite to create and update records for reservations, reservation participants, and user roles
- Utilized Django's core libraries to integrate an email service for providing updates to users and administrators

Interactive Periodic Table (Android) August 2022 - December 2022

- Collaborated with a three-person team to develop an educational Android application that provided an interactive periodic table for chemistry students.
- Implemented the application using Kotlin, Android Studio, and the Model-View-ViewModel (MVVM) architecture.
- Designed multiple interactive views and integrated a database-backed repository to support element information and application functionality.
- Participated in UI/UX planning, sprint planning, and collaborative software design throughout the project lifecycle

ReZerve - Startup Project September 2020 - January 2022

- Worked with a team of 8 to ideate, create, and maintain a web application purposed for helping stylists book appointments with clients and track their performance
- Utilized TypeScript and the React framework to develop separate user flows for businesses and clients
- Adapted to a new, fast-paced work environment where I learned to use new tools on the spot when face-to-face collaboration was not applicable
- Implemented Stripe's Payment API to ensure secure and confirmed payments by all parties involved
- Maintained live web application through regular dependency checks and updating libraries

Telehealth Development/Research Team Member August 2019 - February 2020

- Collaborated with a team of 6 to examine the gap of telemedicine practices in Arkansas
- Conducted research surveys and interviews with over 400 consumers to survey the telehealth market
- Utilized Proto.io to create a prototype for mapping telehealth providers, pitching our solution to UAMS
